If the employee has only completed the first step of a 2-step Mantoux tuberculin skin test within the preceding 12 months, then the second step of the 2-step Mantoux tuberculin skin test or other single-step tuberculosis screening test must be administered. A single annual tuberculosis screening test must be administered thereafter, unless the medical director of the facility or his designee or another licensed physician determines that the risk of exposure is appropriate for a lesser frequency of testing and documents that determination. The risk of exposure and corresponding frequency of examination must be determined by following the guidelines of the Centers for Disease Control and Prevention as adopted by reference in paragraph (h) of subsection 1 of NAC 441A.200. 4. An employee with a documented history of a positive tuberculosis screening test is exempt from screening with skin tests or chest radiographs unless he develops symptoms suggestive of tuberculosis. 5. A person who demonstrates a positive tuberculosis screening test administered pursuant to subsection 3 shall submit to a chest radiograph and medical evaluation for active tuberculosis. 6. Counseling and preventive treatment must be offered to a person with a positive tuberculosis screening test in accordance with the guidelines of the Centers for Disease Control and Prevention as adopted by reference in paragraph

(g) of subsection 1 of NAC 441A.200.

7. A medical facility shall maintain surveillance of employees for the development of pulmonary symptoms. A person with a history of tuberculosis
